

Thank you.

Thanks for downloading the iPhone toolbar icon set from app-bits!
We really appreciate your interest.

What you have downloaded

Inside this package you should find the following items:

iPhone Toolbar Icon pngs

To make them easy to preview and to make them usable on other platforms there is a gradient applied to the icons. When these are loaded into your app, they will work correctly with the standard effects and they will appear properly in your apps.

The icons use variable opacity to take advantage of the effects applied by the iPhone. It allows creation of a feeling of depth or demonstration of emphasis on objects in the icon.

How can I use these icons?

These icons are released under the Creative Commons license and can be used on any media, for commercial or non-commercial purposes. The icons may not be modified in any way. We would appreciate if app-bits could be mentioned when the icons are used!

Need custom icons?

Do you need custom icons that really fit with your app? We provide full design services at very competitive rates. We create new icons from scratch or if you want to tweak one of the existing icons in the store, we can do that too.
